

Alan L. Gordon, **GOP candidate for Rhode Island Attorney General**

Re: Promising new Energy/Security development

Donald J. Trump, President of the United States of America

31st July, 2026

President Trump:

Please direct your attention to the attached letter from my campaign manager, retired Raytheon defense contractor Electrical Engineering Section Manager Anne Armstrong. It concerns a promising new energy/security development, over which you exercise uniquely personal control.

During WWII, the FBI entrusted your uncle John Trump, an Electrical Engineer at MIT, with the classified papers of Nikola Tesla, shortly after the inventor's death. Still-hidden documents within the trove may offer new hope to Rhode Islanders struggling with rising energy costs -- because the RI Statehouse dome was **built by Stanford White, Tesla's Wardencliff Tower "free energy dome" architect, at the same time, in the same design, and sharing key features indicative of a power generator.** An archive search of classified and/or otherwise hidden Tesla documents -- whether held by public agencies, or by your family -- may make this the country greater than we recently thought possible. Please help us fire up this Statehouse.

Be realistic -- expect a miracle,

Alan L. Gordon, Alan Gordon for Attorney General in RI

CC:

Hon. Charles Calenda, United States Attorney for the District of Rhode Island

Alan L. Gordon, **GOP candidate for Rhode Island Attorney General**
Hon. Chris White, United States Secretary of Energy

Hon. John Thune, Majority Leader, United States Senate

Hon. Steve Scalise, Majority Leader, United States House of Representatives

Hon. Dan McKee, Governor of Rhode Island

Hon. Jessica de la Cruz, Minority Leader, Rhode Island Senate
Hon. Michael Chippendale, Minority Leader, Rhode Island House of Assembly
